€390.00

Product no.: IN-919338.R1

In 1972, when Miró was 79 years old, he created a series of colour lithographs for his catalogue raisonné "Lithography I". The world-famous motif "The Singing Fish" is one of the most beautiful of these motifs. In this work, Miró interprets the sea with its lively life in his characteristic style. Winding fibres and drifting lines culminate in the "The Singing Fish". © Succession Miró - by SIAE 1999. Maestri Della Pittura.
