"Spotting a snowy owl in the wild requires excellent powers of observation and immense patience. Even when it passes close by, its black and white plumage makes it hard to spot in the rock-strewn snowy landscapes of the tundra. However, this filigree bronze sculpture lets you admire the beauty of the nocturnal hunter at your leisure.

Sculpture made of bronze, white patinated. Size approx. 30 x 56 x 40 cm (w/h/d). Weight 14.5 kg.
