

## Small garden globe "Found Object"

€128.00

Product no.: IN-718355

It almost gives the impression that it has been slumbering in the ground since Johann Sebastian Bach's time and was archaeologically secured not so long ago. However, it is precisely the cracks and "missing" fragments of the globe, which are made of sheet steel and covered with a rust patina, that make it the perfect garden decoration - planted with roses or illuminated from the inside with fuel gel. The globe stands firmly on a plate. Diameter approx. 40 cm.
