The original idea for Garda Alexander's "Seed" sculptures came about during a dive. Inspired by the fascinating underwater world, she created a model out of paper and later out of wax. During the creation process, she found similarities to the shape of a brain or a seed, which she did not see at first. Nature itself inspired her, and she wants to inspire the viewers of the works in the same way.

Garda Alexander's interpretation of a symbolic or metaphorical representation of our mind as the creator of our reality. Unique piece made of light pigmented copper, signed. Size 26 x 26 x 26 cm (h/w/d). Weight approx. 3,2 kg.
