

Kerstin Stark: Sculpture "Striving Upwards", bronze with cast stone

€298.00

Product no.: IN-440655

With her reduced, high-contrast design, Kerstin Stark was representative of a young generation of artists who convey messages of everyday life with their bronze sculptures. Kerstin Stark deliberately contrasts the finely polished bronze with the pedestal of black-coloured cast stone, giving her protagonists a special luminosity.

The climb up the career ladder is steep. Every person has to climb the ladder on their own. But who knows what awaits them at the top... Table sculpture in polished bronze with cast stone base. Height 24.5 cm, width 11.5 cm, depth 8 cm.
