Knuth Seim:
Sculpture "Stargazer", bronze

€2,400.00

Product no.: IN-751306

Stargazing is the origin of all science, and today, as thousands of years ago, human beings look up at the firmament with fascination. Knuth Seim's "Stargazer" is no exception - armed with a long telescope, he gazes at the glittering firmament. Seim portrays him with almost dramatic body tension: His feet are slightly bent for a secure stand, and his head tilted far back. He seeks to grasp his target. Seim, born in 1961 in Karl-Marx-Stadt (Chemnitz), returns to his artistic roots with the Stargazer. Since a study visit to Senegal, the trained stonemason and sculptor has mainly worked in a simple, reduced style. But with this sculpture, he once again realises his motif figuratively and realistically.
The figure was originally created as a design for a sculptural group for the Märkischer Platz in the "City of Optics" Rathenow.

Sculpture cast using the Lost-Wax-Process in bronze, chiselled and patinated. Limited edition 199 copies, signed and numbered. Size 12 x 40 x 10 cm (w/h/d). Weight approx. 2,5 kg. Exclusively at ars mundi.
