

Fossil Pterosaur

€280.00

Product no.: IN-185026

Stone witnesses of prehistoric times: At the time of the first flowering plants, when life began to soar, organisms in the vast lagoons of the Jurassic Sea were transformed into minerals, into naturally created works of art and stone witnesses of former communities of life. Their study provided the basis for evolutionary research. Our true to the original replicas of famous and unique fossils provide deep insights into the life of the prehistoric world.

This flying lizard, which lived until the end of the Cretaceous period, had a very aerial skeleton, probably fluttered like a bat and fed on crinoids, notched animals, small fish and insects.

Original: Bürgermeister Müller Museum, Solnhofen. White Jurassic (Malm), approx. 145 million years old. Limestone.

Polymeric ars mundi museum replica cast by hand, covered with felt on the back; 2 suspension holes. Size 35 x 20 cm.
