

Fossil Ichthyosaur

€1,100.00

Product no.: IN-308158

Stone witnesses of prehistoric times: At the time of the first flowering plants, when life began to soar, organisms in the vast lagoons of the Jurassic Sea were transformed into minerals, into naturally created works of art and stone witnesses of former communities of life. Their study provided the basis for evolutionary research. Our true to the original replicas of famous and unique fossils provide deep insights into the life of the primaeval world.

The Ichthyosaur, which descended from land reptiles, grew up to 4 m long. The original was found near Holzmaden/Württemberg. Slate, approx. 170 million years old.

Polymer ars mundi museum replica, cast by hand. Size 122 x 40 cm, with suspension device. Weight approx. 25 kg.
