

Drinking vessel "Parrot"

€218.00

Product no.: IN-007669

This object is an eloquent example of the creative power of artists in the pre-Classical period, 1200-600 BC. Originally it was used as a drinking vessel, but today it is a sensational object of art. Particularly striking: the realistic modelling of the head and beak.
Original: National Museum Mexico City, Del Occidente de México.

Ceramic. Size 22 x 30 cm.
