

Renaat Ramon: Sculpture "The Muses Melpomene", bronze

€2,600.00

Product no.: IN-923913

The works of the Belgian Renaat Ramon are characterised by their great objectivity. Geometric structures, clear lines and a monochrome colour scheme are frequently recurring features of his sculptures. Despite all their rational austerity, they also radiate something calming and harmonious.

The Melpomene, who originally appears in Greek mythology as the muse of music, song and dance and later as the muse of tragedy, is transformed by Renaat Ramon with almost mathematical precision into a fascinating futuristic being.

Fine bronze sculpture, patinated and polished. Cast by hand using the Lost-Wax-Process. Limited edition of 75 copies, numbered and signed, with certificate. Size 46 x 16 x 14,5 cm (h/w/d). Weight 10 kg.
