

Life-size statue "Monique" (version with staff)

€448.00

Product no.: IN-722135

It is not only inspiration that brings forth new forms of expression. It is also the technical possibilities. The finely crafted silhouettes of life-size human figures made of sheet steel can only be realised through state-of-the-art plasma cutting. And yet, as unusual as they may seem, at first sight, they are very much in the tradition of large-scale sculpture, which began in stone and marble with the Greeks.

The sculpture "Monique" shows, appropriate to the technique, a modern, contemporary human being and is suitable as an eye-catcher in the garden. A tube welded to the back ensures sufficient stability. The sculpture can be firmly anchored in the ground with the enclosed rod and can stand freely.

Large sculpture "Monique" with a pole: height 175 cm. Made of 3 mm thick sheet steel and covered with a rust patina. Weight approx. 12 kg.
