Birdhouse "Bauhaus"

€64.00

Product no.: IN-736585

A bird feeder is the perfect observation spot for hobby ornithologists. But who says it has to be made of the simplest wood? Our bird feeders got style: whether it's Bauhaus, typical Swedish wooden architecture or the archetype of an American farm barn.

Multiholk "Bauhaus" bird feeder and nesting box:
With just a few simple steps, a bird feeder can be transformed into a nesting box. The food, which can be easily filled through the removable roof, is protected from moisture. The construction prevents larger birds such as jackdaws and magpies from feasting in the birdhouse. A mounting plate, screws and instructions (for mounting it on a tree) are included. Size 18.4 x 24.7 x 19.4 cm (w/h/d). Matching metal stake please see item number 885258.
