

Sculpture "Little Lady of Justice"

€590.00

Product no.: IN-379626

Even in ancient Rome, she was worshipped as the incorruptible goddess of justice, law and fairness. Lady Justice, blindfolded, "considers" the law with an introspective gaze, impartially and without regard to the person. The sword symbolises that law is inseparable from power and the "sharpness of the law". In this traditional depiction, Justitia carries the scales in her left hand and the double-edged sword in her right.

Sculpture of finely patinated cast metal on a pedestal of polymer-bonded cast metal after a model from the 19th century. Size incl. pedestal 16.5 x 30.5 x 9.5 cm (w/h/d).
