

Klaus Börner: Trilogy "Italy Journey I-III"

€840.00

Product no.: IN-714629

There are only a few elements that Klaus Börner brings together in his unmistakable pictorial objects - the sun, a tree, a distant copse, and a passing bird. And yet he succeeds in precisely depicting the character of a landscape with minimalist charm.

The trained goldsmith and sculptor works semi-sculptural elements of patinated bronze into a finely structured slate slab, which gives the object an astonishing spatial depth and, at the same time, as colour composition, captures the evening light of a progressing sunset most impressively (an effect that makes an arrangement of all three objects an expressive total work of art). The model for the colouring of the sun was a snakeskin jasper from the artist's collection.

Three wall objects are made of slate and bronze. Each piece is a unique piece signed by the artist. Size 20 x 15 cm each, weight approx. 2.5 kg each. With suspension device. Catalogue raisonné 445/450/455.
