

Glass vase "Stripes"

€134.00

Product no.: IN-733411

Handicraft and work of art: vases from the Loranto glassworks. Glass is a fascinating material that humanity has had at its disposal for millennia, although it has "only" been transformed into everyday products for a few centuries. And it has always challenged designers - right up to the present day. This is also the case at the Loranto glassworks, where traditional techniques have been used to create designs by the Ozzaro design studio since it was founded in 2000. In the process, glass works of art are created in many colours, shapes and styles, all of which also prove themselves as objects for everyday use.

The echoes of Pop Art are unmistakable here: bright red, combined with bright white and strong, black rings, invite you to expand the vase with another colour (such as a blue bouquet) to create an even more colourful combination. Size 28 x 34 x 28 cm (w/h/d).
