"Flaps its wings a small blue butterfly (...) I saw happiness beckoning me", says Hermann Hesse. Endless things have been written about the beauty of butterflies, but they are actually even more significant: Scientists consider them "bioindicators" - when butterflies are around, the ecological world is (still) in order.

Editions in bronze, cast using the Lost-Wax-Process, chiselled and patinated by hand. Size 10 x 13-13.5 x 1 cm (h/w/d). Weight approx. 0.3 kg each. Can be fastened using the threaded pin supplied.

The set includes both butterflies.
