

Ulrike Buhl: Sculpture "Dynamic Event" (2014) (Unique piece)

Product no.: IN-884343

This title would suit Buhl's mixed media works just as well. However, she provides a contemporary translation that is concerned with pure formality and seeks to find answers to technical questions of representability, aesthetics and reflection.

The artist uses effect paints which are used in the car industry, which also appear in the surface reflections and iridescent colour gradients of insects. The artist's synthetic working process becomes visible; Buhl manages, seemingly playfully, to capture movement and aesthetics in her sculptures.

Sculpture made of mixed media and effect varnish, 2014. Height: 113 cm. Width: 48 cm. Depth: 51 cm. With a pedestal made of wood with a brass real metal coating, size: 60 x 40 x 40 cm (h x w x d).
