

Ukata Arua: Picture "Kissing Elephants", framed

€790.00

Product no.: IN-729706.R1

At first glance, the picture looks like a large-scale, abstract mosaic. Only when looking at the picture a second time, the shape of the two elephants facing each other become visible. They are formed by the crisscrossing lines meandering across the whole surface and the bright coloured elements. The question of "representationalism" or "abstraction" does not concern the artist; his work - like African art since time immemorial - aims primarily at capturing the symbolic, the essential, indeed the core of nature in a fantasy-like image.
