

Wilhelm Lehmbruck: Sculpture "Mother with Child" (1907), bronze version

€2,980.00

Product no.: IN-705888

The theme of "Mother and Child" occupied Lehmbruck throughout his whole life. The 1907 version is a central work of his first Paris exhibition. It shows the mother as a happy, loving woman and is still clearly indebted to classical sculpture. Lehmbruck's outstanding sense of size and proportion already heralds the sculptural condensation of later works. Lehmbruck created the sculpture after his first trip to Italy, and its Pietà gesture was probably inspired by the Old Masters admired there.

Sculptor's model after the original, size 25.5 x 26 x 22 cm (w/h/d). Edition in fine bronze. Cast using the Lost-Wax-Process, patinated and polished by hand. Weight approx. 8.4 kg.
