Wall sculpture "On the Stairs", steel

€780.00

Product no.: IN-895866

The wall sculptures show only the silhouettes of the motifs. The surfaces of the wall objects show no further details of the motif but are covered with abstract, colourful and seemingly random patterns of acrylic paint. The contrast between the defined, figurative silhouette and the surreal sea of colours creates a unique and exciting aesthetic.

The elaborate production process always begins with sketches drawn by hand. Based on these, the outlines of the motif are cut out of the metal with a laser. This blank is primed and then painted with acrylic paint. Finally, the paint is smudged with a leather cloth and the surface is briefly heated with a flame to create small bumps and bubbles. Due to such processing steps, the result is always unpredictable and each object becomes a unique piece with a unique shape and colour structure.

Wall object made of steel. Seven figures, laser-cut and hand-painted, move in their own dynamic, which is further emphasised by the expressive colouring. The result is a lively and impressive room accent. Size 66 x 108 x 2 cm (h/w/d). Weight 3 kg.
