

Fossil Crinoids on Driftwood

€1,280.00

Product no.: IN-308162

Stone witnesses of prehistoric times: At the time of the first flowering plants, when life began to soar, organisms in the vast lagoons of the Jurassic Sea were transformed into minerals, into naturally created works of art and stone witnesses of former communities of life. Their study provided the basis for evolutionary research. Our true to the original replicas of famous and unique fossils provide deep insights into the life of the prehistoric world.

Stuck on drifting tree trunks, the flower-shaped animals, which belong to the echinoderms, swayed with their delicate-looking calyxes in the Swabian Lias.

Original: privately owned. Place of discovery: Holzmaden/Württemberg. Jurassic Lias epsilon. Slate, approx. 170 million years old.

Polymer ars mundi museum replica, cast by hand. Size 61.5 x 108.5 cm, with suspension device. Weight approx. 31 kg.
