

Friedensreich Hundertwasser: Picture "Vapor - The Cabo Verde Steamer". Special edition with 4 stamps à 50 Escudos, blue

€340.00

Product no.: IN-457095

In 1973, for the first time, Hundertwasser visited Cape Verde, a group of 16 volcanic islands 600 km off the western tip of Africa. The island state, which was still under Portuguese authority at the time, became independent 2 years later.

1982-1985 Hundertwasser created the stamp edition for the new state of Cape Verde. With the finest lines, Hundertwasser's watercolour design 770 was engraved into a steel plate and realised in three colour variations for the 50 Escudos special block issue. The steel engraving process, which is rarely used today, is particularly suitable for small depictions.

The three colour variants of "Vapor" were printed in a limited edition of 10,000 copies each by the Austrian State Printing Office. Size 26 x 19 cm (h/w), individually numbered. We deliver the print in a lavish object frame with a matt black bevel cut passe-partout, which was embossed blue by hand to match the motif. The numbering is visible through a window in the passe-partout. Framed in a black solid varnished wood, dustproof glazing. Size 35.5 x 26.5 cm (h/w).
