

Jewellery set "Gold Discs"

€340.00

Product no.: IN-734713

Colombia was discovered by Amerigo Vespucci, not by Christopher Columbus - yet this jewellery is considered "pre-Columbian". Our replicas originate from the Gold Museum in Bogotá and can be traced back to grave findings.

This jewellery set shows pre-Columbian America in its simplest form: 7 small plates made of 24-carat gold-plated metal elements line a necklace, and two others form the matching stud earrings.

Necklace: platelets 2.3 x 1.6 cm. Chain length 94 cm, can also be worn double. Stud earrings: size 2.3 x 1.6 cm.

The jewellery set includes a necklace and stud earrings.
