

Paul Wunderlich: Sculpture "Stele of Hermes", bronze

€1,900.00

Product no.: IN-686654

The dominant element of the stele of Hermes is the column shaft, which makes up almost two-thirds of the sculpture. A fine line interrupts the mathematical-metallic smoothness of the shaft and winds upwards in a generous curve. This is followed by the formed, highly stylised torso. A bold S-shaped sweep of lines between the shoulder blade and the hip dissolves the archaic statuary and fills the sculpture with life.

Fine bronze sculpture, patinated, partially polished. Factory number 285, cast by hand using the Lost-Wax-Process. Limited edition of 1,250 copies, numbered and signed. The height of the sculpture is 39 cm. Mounted on a rectangular bronze plinth 13 cm long. Weight 2.2 kg.
