

Luwagala: Garden ornament "Meerkat" (small version)

€88.00

Product no.: IN-735195

The special garden dwellers: In Africa, art is often not created on prefabricated canvases and is made by purchased paint tubes. It is created from whatever was available to the artists at the time - the brothers Aron and Innocent Luwagala from Zimbabwe, for example, reach for sheet metal, screws, tubes and wires. With their exuberant imagination and almost unbelievable skill, they shape them into lifelike meerkats in their workshop - by hand.

In European zoos, the meerkats are real legends and not just for the youngsters. In Africa, they live in large societies with distributed roles - including that of the guardian, who stretches himself high to secure the environment for all the others. The meerkat is, therefore, a social creature - also, in your garden, the meerkat, artfully sculpted by the Luwagala brothers, will look friendly.

Meerkat small. Size 14 x 31 x 27 cm (w/h/d). Each piece is unique. Sizes and colours may vary.
